up to £58.00 per
hectare with the
SFI Soil Standard!

SFI Soil Standard

What is the Sustainable Farming Incentive (SFI)?

SFI aims to help farmers manage land in a way that improves food production and is more environmentally sustainable. The full scheme is due to be rolled out in 2024 and has eight standards within it.

The SFI Soil Standard, available in 2022, aims to improve soil health, structure, organic matter and biology on arable and grassland farms. There are three levels within the SFI Soil Standard.

 Introductory Available from June 2022	 Intermediate Available from June 2022	 Advanced Available in 2024
<p>Requirements:</p> <ul style="list-style-type: none">✓ Basic soil assessment✓ Soil management plan✓ Increase Organic Matter <p>⊕ Additions for the Arable standard: £22/ha 70% Overwinter cover</p> <p>⊕ Additions for the Grassland standard: £28/ha 95% Green cover</p>	<p>Requirements:</p> <ul style="list-style-type: none">✓ Basic soil assessment✓ Soil management plan✓ Increase Organic Matter <p>⊕ Additions for the Arable standard: £40/ha 20% Overwinter cover being mixed species</p> <p>⊕ Additions for the Grassland standard: £58/ha 15% Herbal ley</p>	<p>Requirements:</p> <p>To be announced in 2023</p>

Calcium

Our team can help you claim the SFI Soil Standard.

Our Standard Loam and Organic Matter soil tests deliver the requirements needed to comply.

This covers the introductory and intermediate levels on both arable and grassland.

Omnia enables you to identify areas within the field that need improvement and create management strategies to fulfil requirements of the SFI Soil Standard, including:

- ⊕ Basic soil assessment
- ⊕ Soil management plan
- ⊕ Evaluation of organic matter and suggestions for improvement

Omnia is the only digital system in the market delivering all these requirements.

Ensure every soil health decision is tailored to your farm and earn money with the SFI Soil Standard.

Available for growers to use themselves, or as part of a Healthy Soils service.

- ✓ **Easy to use**
- ✓ **All in one place**
- ✓ **On the go, in the field**

We offer a range of soil services to help improve yield production and nutrition planning. Take your soil to the next level.
